

### Learning After Effects (2023)

2025-02-10 17:11:59   [label](#)   [我要反馈](#)   [下载页面](#)

**Learning After Effects (2023):** This course, designed to introduce and encourage newcomers thoroughly, teaches the basics of Adobe After Effects. The instructor, Mark Christiansen, introduces you to the fundamental concepts of After Effects and video and film motion design. Then Mark explains what is available in the After Effects interface and the basics of working with After Effects: building compositions using layers, animating, adding effects, creating in 3D, and rendering. Mark uses these techniques while guiding you through a demo project, showing how everything is integrated into a natural workflow. Mark demonstrates how to utilize automated tools to connect text and video, Import the Premiere Pro sequence, customize and incorporate motion into text, align the motion of a camera, alter layers, create animations for and animate an Illustrator logo, and add dimension to a design.

#### How can we create motion graphics, visual effects, and compositing in the post-production process of filmmaking and video production?
