Java & ActiveX　　Components

Instrumentation Studio for ActiveX is a set of common instrumentation interfaces and graphic ActiveX components. It comprises 15 strong ActiveX elements related to the user interface, gauge, instrumentation, chart, fashion, etc. These elements are high quality and quite well known from the process control, MMI, scientific, engineering, simulation, and data acquisition communities. They all are made at a high rate—ten years of merchandise history, leading well-known clients, higher stability, and reliability.
This program bundle comprises AniLine, Annunciator, DGauge, Annunciator, Gauge, Indicator, Knob, Led, Meter, NumberLed, Odometer, Percent, Selector, Slider, Toggle and Trend, etc. 15 elements (*.ocx), 1 demo, all aid documents and VB/VB/Web samples.

CST Instrumentation Studio for ActiveX is a set of common instrumentation interface and graphic ActiveX components.

Instrumentation Studio for ActiveX includes 15 economical and powerful ActiveX components related to the user interface, gauge, instrumentation, chart, fashion, etc...

These elements are high quality and very well known from the process control, MMI, scientific, engineering, simulation, and data acquisition communities.

Instrumentation Studio for ActiveX bundle comprises Annunciator, AniLine, DGauge, Annunciator, Gauge, Indicator, Knob, Led, Meter, NumberLed, Odometer, Percent, Selector, Slider, Toggle and Trend, etc. 15 elements (*.ocx), 1 demo, all aid documents and VB/VB/Web samples. You might see them from the installed directory.

CST Instrumentation Studio for ActiveX Great Features:

- Factory Automation and Simulation
- Simulation
- Real-time data acquisition and screen
- Man-Machine Interfaces
- Lab emulations
- General data screen ports
- Plotting and Charting

- Visual Basic
- Visual C++
- Visual Studio.NET
- Delphi
- Borland C++ Builder
- PowerBuilder
- Visual FoxPro
- Microsoft Access
- Web Explorer
- Microsoft Office
- Microsoft FrontPage
- LabVIEW
- MATLAB
- Additional HMI/SCADA Program
