- Class Project #3 - 3D LED Wall in Warehouse
- Free Procedural Materials + Project Files
- + more

You will learn the following:

- Navigating Blender 101
- Shading + Lighting
- Animation
- Render Engines + Export Settings
- 3 Class Projects
- + more

3D animation is one of those skill sets that can feel intimidating to figure out how to learn.

- A lot of the software is costly.

- The interface is complex and overwhelming.
- It's hard finding a teacher who can lead you to results you can be proud of

We've been on a journey to overcome these roadblocks once and for all. And we developed the course we've always been looking for ourselves.

We're so excited to team up with Ducky3D to create the ultimate course to get you started in 3D animation with the FREE software called Blender.

- Yes, Blender is FREE!
- No, you don't need a crazy machine to run it (I'm running it on a MacBook Air right now).
- You can learn it in about 1 hour with the right teacher.

Well, we teamed up with a master of the FREE software Blender to we're going to help you overcome these roadblocks so you can get started in 3D animation today!

In this course, you'll quickly learn how to navigate Blender like a pro confidently. And then, we'll move on to creating three unique 3D scenes from scratch together.

- 3D Animated Logo
- 3D Terrain Mountain Scene
- 3D LED Wall in Warehouse

We know there's no better way to learn than by getting your hands dirty inside the program. So by the end of this course, you'll feel confident knowing how to use the tools in the software practically.

What is Blender 3D Master?

Blender is an open-source 3D computer graphics software that is widely used for creating 3D animations, visual effects, video games, and more. It is known for its versatility and extensive feature set, making it a popular choice among artists, animators, and designers.
