Important Note This will work perfectly with R26 or R2023. Some of them don't. Selection Manager and Smart Export I have updated the code so that they work.

The only thing that doesn't work with R2023 is Effectors which is available for R23 up to R26. Weight Scripts aren't working even when you use R26 as well as R2023 and will require a lot of work. The library files for browsers must be converted.
