I developed these presets over one year ago but haven't made them available to the public. Since then I've been testing and using these on my own photographs since then and am really excited about them! If you're looking to get your glowing photos the magic sauce, try these ONE-CLICK presets that can help you achieve this! You can also apply them to enhance non-golden hour images If you want to create an edgy tone to your photo.

What do you get

- 10 Lightroom Presets for Lightroom in XMP format. They can be used on desktops as well as mobile devices. 5 pm 6, 530p dusk, Glow Sunrise, Sunset, Turks, Twilight, Vitamin D
*Dusk is identical to "the Motto" in the Drake preset pack (It's so great that I decided to add it)

What do you need

- Adobe Lightroom Version 7.3 or higher

How to upload Presets in LR.mp4:

What are Golden Hour Presets for Lightroom?

Golden hour presets available for Adobe Lightroom are pre-configured settings which you can apply to your images to increase or recreate the beautiful and warm light that happens in "the "golden hour." The term "golden hour" refers to the time between sunrise and before sunset, when the sun has sunk to the sky creating a soft, golden, warm light over all it touches. Photographers usually prefer this time of day to capture beautiful and pleasing lighting conditions.

Golden hour presets available in Lightroom generally contain modifications to several parameters like exposure white balance, saturation contrast, and split toning in order to recreate the romantic and warm ambience that is associated with this period of time.
