Nitro4D MaterialMaker v1.01 For Cinema 4D: When you download textures, you will have many channels to consider, like diffuse, usual, etc.
With this plugin, you can create easy material with just one click and set up your own preset; there are already presets for cinema4d, octane, Arnold, corona, and V-Ray. The RedShift must first create the materials in Cinema4D and then apply coverts to make it redshift.

This plugin will save you time by allowing you to click one button and have the desired material.
