

Dark Mood Lightroom Preset By qrrtyn (Mob, Desk)

2025-02-10 16:39:32 [label](#) [我要反馈](#) [下载页面](#)

This preset is designed to darken your photos. Before applying this preset, I recommend that you adjust the white balance of your camera. This preset can bring back dark images that are underexposed and brings them back to life in a single click. This preset can be used for portraits, lifestyles, travel, or even animal images. The preview includes examples of the images. They are there to provide some references to photos that have been pre-processed.
