- An evolving collection of easy native resources such as Adobe After Effects. They do what is explained in their description and nothing else.
- Select exactly the Identical property In each layer of the essay: This Search Box's missing attribute at the deadline of After Effects. You Decide on a home (for Example that the Fill Color of a silhouette layer), and this control positioned from the Layer menu will Hunt and choose every similar land located in the article. Magic.
- Generate the Representative colors of a picture: This plugin shows a palette with all the Dominant colors in a coating. Colours can also be added to color pickers to Link them with expressions. Dope.
- Copy a layer Several times: When creating setups for our resources such as Pastiche or even Newton, We frequently replicate things ("I need 800 circular shapes at this time!"). The Select All -- Duplicate -- Glue chain has concluded. This control in the Layer menu permits you to replicate the chosen layer X amount of occasions. Lightning-fast.
- Paste a picture out of your Clipboard right to your essay: Sometimes you simply wish to copy/paste a picture on your timeline without importing it.
- This is going to make your fantasy comes true.
- This command in the Edit menu Allows You to paste a picture from your clipboard Straight to your own composition.
- You could even set the place where pictures will be stored. Yeah.
- Render Animated PNG document Straight from AE: Gifts are fantastic. APNGs are somewhat better.
- APNG files encourage 24-bit colours and 8-bit transparency.
- You can now leave APNG straight from the depart queue. Boom.

### New changes:

- PastelImage: Fixed a bug in the Settings dialog.
- APNG Export: Fixed fps bug in the render settings.
- APNG Export: Fixed a bug that was sometimes crashing AE at the end of the render.
- added BakeAllExpressions (bake all expressions found in the selected layers)
- added CollectFonts (collect all fonts used in the project)
- added CopyColor (pick a color and save it in hex format to the clipboard)
- added RemoveAllExpressions (remove all expressions from the selected layers)
- APNG Export: added a parameter in the Options dialog to specify the number of loops (by default this value is 0 which means infinite looping).
- Copy Color: fixed a bug that was occurring with machines with multiple screens/monitors.
- Fixed a bug in Color Palette that was occurring when multiple instances of the effect were used.
- Changed behavior of Color Palette: the color bar drawn over the layer is now dynamic and updates automatically according to the layer content.
- CC 2022 compatibility for every plug-in.
- ColorPalette: fixed a memory leak issue
- AE 2022 compatibility
- Apple Silicon architecture (M1) support for macOS versions
- added a new plug-in Color Transfer that allows you to recolor a layer to match the color characteristics of another layer
- Paste Image: changed destination folder options
- Color Transfer: fixed a bug with 16 and 32 BPC projects
- Select Same Properties: added the ability to act on the selected layers only (otherwise every layer is considered)
- Copy Color: fixed M1 compatibility issue
- added a new plug-in "AddPathVertices" that allows you to add vertices to the selected paths (masks or shapes).
