Just Sound Effects Renault R4: Enjoy the authentic roar of the French classic by listening to the Renault R4 GTL sound library. This meticulously crafted audio collection contains recordings of among the world's most well-known cars from Renault, providing a complete experience of the distinctive sound of this legendary car.

The bundle includes a variety of driving events, each captured from a variety of microphone angles. All recordings are synced to allow easy switching between microphone positions or from the outside toward the driving seat. You can select nine perspectives: forward or back, passing by, exhaust, engine, and interior. To give you a whole immersion experience, the perspective of the interior was recorded using the quad ORTF. Alongside the sounds of driving, there are many additional features and sounds.

It was created to aid sound designers, audio professionals, and car enthusiasts. The library has many options for use. With its precise audio recordings from the Renault R4 GTL, the collection is a fantastic source, whether you're creating a film or game that requires authentic car sounds or simply a fan of classic cars.

- A wide range of sounds for driving, such as engine start or idle, acceleration constant speeds, deceleration, and much more
- Multiple microphone perspectives: mono & stereo exterior, engine compartment microphone, exhaust microphone, quad interior
- Miscellaneous sounds and accessories such as doors, indicators, handbrake, horns, seat belts, and much more
