

## Unreal Engine - Inventory Framework Plugin v2.4

2025-02-10 16:58:56 label 我要反馈 下载页面

### Unreal Engine - Inventory Framework Plugin v2.4:

Introducing the ultimate inventory solution – our robust Inventory Framework Plugin! Crafted to empower both C++ programmers and Blueprint designers, this framework revolutionizes inventory systems with its innovative features and seamless integration.

#### Unified Foundation:

- C++ foundation for programmers.
- Blueprint foundation for designers.
- Actor components and item parents with abstract logic for easy integration of mechanics and systems.

#### Designer-Friendly Widgets:

- Widgets designed for easy implementation of logic and animations.
- Handles drag-and-drop, highlighting, splitting, combining logic, and more.

#### Data Assets for Items:

- Utilizes data assets instead of data tables for item information.

#### Performance Optimization:

- No reliance on widgets for data handling.
- Access all information about an item efficiently.

#### Infinite Item Structure:

- Container system allows nesting of items infinitely.
- Create complex inventories, like backpacks containing containers with items, with endless depth.

#### Actor Appearance Duplication:

- Automatically duplicates item appearance for inspection and icon generation.
- Works seamlessly with all actors, eliminating the need for hierarchical setups.

#### In-Game and In-Editor Tools:

- Powerful tools for quality control and workflow enhancement.
- Speed up development with efficient in-game and in-editor features.

#### Technical Details:

##### Code Modules:

- InventoryFrameworkPlugin (Runtime)
- InventoryFrameworkPlugin (Editor)
- IFP\_Crafting (Runtime)
- IFP\_Crafting\_Editor (Editor)

Revolutionize your inventory design, enhance customization, and streamline your development process with our Inventory Framework Plugin – the ultimate tool for creating the perfect inventory system in both C++ and Blueprints.
