Massacre at The Gallery Opener VH-3267627: This project was made in conjunction with Halloween or Beyond. It is suitable for opening TV programs, Youtube channel openers, and many other purposes. Scary, Horror, Haunting.

- Expression control: Text color, scale, position, wallpaper color, and project color mood
- Texts can be edited in AE. However, those effects (Melting/Unmelting), are a PRE-RENDERED movie file. You will need to manually adjust the position of those effects when you change your text. If your text grows longer, copy and paste these effects. To cover more words, I have included 4 types (1 effect per line) and 6 in one-row files.
- Duration: 40 seconds
- 13 Placement of Video or Photo
- 8 Text placement
- Placement of 1 Title
- To add the realistic feeling of a gallery, pre-rendered 3D scenes
- Pre-Rendered text melting and unmelting effects
- PDF tutorial guide included
- Photoshop layers
- 6 Blood splatter.png files
- Pre-rendered particle effects
- Music is not included.
