Aescripts Shadow Studio 3 v1.0.5 (Win, Mac): Unleash the power of raytraced shadows and light with the ultimate plugin for After Effects, Shadow Studio 3.

How to use RGBA pipeline to cast colorful light to create a shiny reflection?

You can use "Aescripts Shadow Studio".

Where can I download the product?

After subscription, You can download it for free from here.

Please note that the presets are currently compatible with CC 2021 and above.

Elevate your design game with soft shadows, global illumination, inbuilt extrusion, and bevel. Shadow Studio 3 does it all with turbocharged raytracing, ushering in the next level of realism. Simulate stunning 3D phenomena like global illumination, ambient occlusion, subsurface scattering, and glossy reflections based on your alpha channel. Master the art of photons by casting light and shadow. Shadow Studio 3 becomes your lighting playground, allowing you to create voluminous results with directional and point lights.

Enhanced Compositing Controls:

- All 37 Ae blending modes, alpha biasing, and matte gamma control for precise looks.

Enhance your workflow and achieve stunning effects with Shadow Studio 3, the ultimate After Effects plugin for raytraced shadows and light.

- Over 36 included presets to kickstart your creativity, along with project files.
- Intuitive gradient editor for animated, offset, and looped gradients.
- Perfect blending with the Linear Gamma checkbox and stylistic results with the No Interpolation option.
- RGBA Pipeline for casting colorful light based on your layer source, generating glossy reflections or stylized results.
- Improved flexibility with the ability to combine multiple modes.
- Inner Shadow mode is a checkbox compatible with all other modes, allowing you to generate inner shadows with various light types.
- Powerful utility presets, including Directional Point Rig for a 360° orbiting light rig and Utility Bevel for a subtle, stylish bevel in any composition.
- Versatility beyond realism, offering a range of styles from LoFi and retro to pixelated and cartoonish.

What is Aescripts Shadow Studio?

Aescripts Shadow Studio is a script or plugin developed for Adobe After Effects, aimed at simplifying and enhancing the process of creating realistic and customizable shadows for motion graphics and visual effects projects.
