The Light Leaks 2 Package is a 14-texture package that expands on The original package by providing you with escapes more commonly seen when using Toy cameras. The flows found in this package include a dreamlike quality for your Photographs, washing them using arbitrary color and classic flares. But do not let The random colors fool you. These overlays can add a strong and real light leak Effect to any photo.

Contains 14 high-resolution - 4000x4000 pixel textures with An *infinite business permit.

Utilization: This package is best employed with the "Screen" Blending style in Photoshop, Photoshop Elements, or some other program that Allows layering graphics with mixing modes. Make Sure You experiment with Different combination modes.
