

Rapid Design FMX UX & Chart v1.6 for Delphi 10.4-11 Alexandria + CRACK

2024-12-18 23:04:00 [label](#) [我要反馈](#) [下载页面](#)

Quick Design Components basically requires the Embarcadero Delphi with the use of the fire monkey advancement add-on for the users. It is not difficult for the user to use it since it is comparatively easy to use the fundamental components of it, and it is considered to be user-friendly. The user has the ability to create the program with the latest styles of the designs that are available also in the Delphi. Quick Design Components UX as well as the chart components are basically contained in the single package for the user and it is likely to be able to create programs quickly and easily with the use of the multi-platform elements of FMX of the various layouts that are available. The cross-platform in this case is a quick design component which has the ability to work across the platform right on the Android, iOS, Windows as well as the Mac OS for the users.

Rapid Design UX & Chart Great Features:

It has the following features and attributes that are stated as below such as:

- The size as well as the color of the component can be freely set by the user based on the choice, and the preference.
- The recent design trends are basically mirrored.
- It has the capability to supply the essential performance to the program development of the mobile for a component.
- It is very simple and easy to use since it is the use of the fundamental components only.
