Tutorial   平面设计

Improve your toning abilities and make your most stunning duotones to date with our comprehensive guide to making fashionable duotones with different moods.

The use of gradients, duotones, or overlays is all over the place these days and in order to get the appearance just right, it requires some practice and some know-how. This is not just applying a gradient map to an image! In addition to the use of duotones in photography, duotone is an effective method of coloring that can be utilized to create black and white designs drawings, sketches, or illustrations or even simplify and make more vivid, full-color photographs.

I'm Evgeniya Righini Brand, and for this course I will combine my knowledge and knowledge as a photographer and graphic designer, to guide you step-by-step through the process of creating visually appealing **images using** trendy duotones with Photoshop.

In this class, I'll teach:

- the best way to prep images in order to ensure they pop when they are toned
- Where to find inspiration for colors and how to mix colors to create different styles that blend modern and classic photographic toning
- and how to apply gradient overlays and duotones to all kinds of single images or multi-image compositions.
- how to improve your workflow through managing presets and by using toning actions
- And how you can prepare images for the web and printing using process and spot colors.

Then, at the end of the article, I'll provide a few tips on making your duotones more effective.

This class is designed for graphic as well as web design, illustration, and photographers looking to add a distinctive aesthetic to the work they create and stand out with the modern graphic style and use of vibrant color combinations. If you're looking to design your first ever duotone photo or master your toning techniques and workflow this class is for you!
