Ja Beats Music Banda Corridos + VST Full Edition:

Banda Corridos is our brand-new bookstore that specializes in local Mexican categories and subgenres.

It contains a variety of contemporary and avant-garde Samples (One Shot) of elements from Mexican grouper bands that feature Norteno, Mariachi, Ranchera, and Corrido styles, as well as effects and textured elements to provide greater authenticity in compositions.

The samples were created using emulators of famous consoles from the analog world to ensure the highest possible quality **considering that the subgenres and genres of this genre typically require live instruments in order to keep their essence.**

Each instrument is separate and renamed accordingly for easy navigation, organization, and easy reading.

It contains the following examples:

- Acoustic Drums (3 Sample Folders with different styles)
- Effects (FX) (Special Effects Folder with 15 Foley and 18 Mixed Effects)
- Instruments (separate instrument folders)
- Basses (4 folders that have basses of different styles)
- Charcheta: (2 Folders)
- Saxor: (1 Folder)
- Trombone (1 Folder)
- Tubas (3 Folders)

Percussions - Folder Contains:

- 10 - Claps
- 08 - Leather Instruments
- 04 - Guitar Percussions
- 27 - Wooden Instruments
- 10 - Metal Instruments
- 35 - Mixed Percussions
- 14 - Tambourine
- 16 - Timbales

Additionally, we have included (in light of the rising popularity of Corrido Tumbado, or Corrido Urbano) an entire Trap Drum Kit to help you mix the two genres that include:

- 10 - 808 that contains the endless 808
- 10 - Hit Hats
- 10 - Kicks
- 08 - Percussions
- 04 - Rides
- 10 - Snares

More than the 450 Samples in all.

If all this wasn't enough to be enough, we've created a virtual plug-in (VST) named **Banda Corridos** with a variety of diverse

SOUND EFFECTS

instruments that can be used to create Corridos Tradicionales, Corridos Tumbados, Bandas Gruperas, Mariachi, and Rancheras.

This Powerful VST comes with effects modules where you can regulate the delay with the parameters for its repetition and time Reverb, as well as room control capabilities and ambient equalization, Cutoff, saturation and also altering an **ADSR** of each instrument.

The plugin is in **both VST and 3** versions and is compliant with the current standards of the industry.

The VST module includes some of the instruments listed below:

- Accordion
- Under Sixth
- Drums Band
- Instruments like Guitars, Basses, and Requintos from the genre
- Trombones
- Trumpets
- Tubas
- Vihuela
