What is Neon Lightroom presets?

Neon Lightroom presets are pre-defined settings and adjustments used in Adobe Lightroom, a popular photo editing software, to create a specific neon or vibrant lighting effect in photographs. These presets are designed to enhance and stylize photos with bold and colorful neon elements, giving them a striking and eye-catching appearance.

Using Neon Lightroom presets involves importing the preset files into your Adobe Lightroom library, selecting a photo you want to edit, and applying the desired preset from the collection. After applying the preset, you can further adjust the settings to fine-tune the effect or match it to your specific preferences.
