Rock The Speakerbox Broken (WAV): Nothing can bring a smile to an individual's face more than the heavenly sounds of chaos and destruction. Sound design for such complicated situations as a building collapsing or an earthquake demands an extensive and diverse range of chaos. To create chaos it is necessary to have the best chaos sound library.

We resisted all odds to build this library of pure chaos. BROKEN has more than 9 GB of HD quality content, spread across 1940 sounds of the construction kit as well as 326 specially designed sounds. From car explosions, car crashes building collapses, and earthquakes, to tearing metal and earth to the smoldering of debris, BROKEN features all elements of destruction.

Filmed in the field and recorded on The Paramount Pictures Foley stage, this library provides sound designers for films games, video games, and the web with the tools to create noise.

Get wrecked. Get BROKEN.
