Twilight Render Create Real Renderings With Sketchup:

Sketchup

SketchUp is a potent 3D modeling tool with robust capabilities that allow designers to investigate and share projects, import and export a variety of formats of files, and make interactive presentations. It is a widely used program around the globe, especially by landscapers and architects, to present events and to create and create 3-D models... SketchUp models consist of faces and lines—a non-parametric 3D modeling application. SketchUp is a non-parametric 3D modeling software. SketchUp, you aren't limited to designing roofs, walls, slabs... It allows you to draw edges that meet at the end of closed contours and automatically generate one side when they are situated on the same plane.
