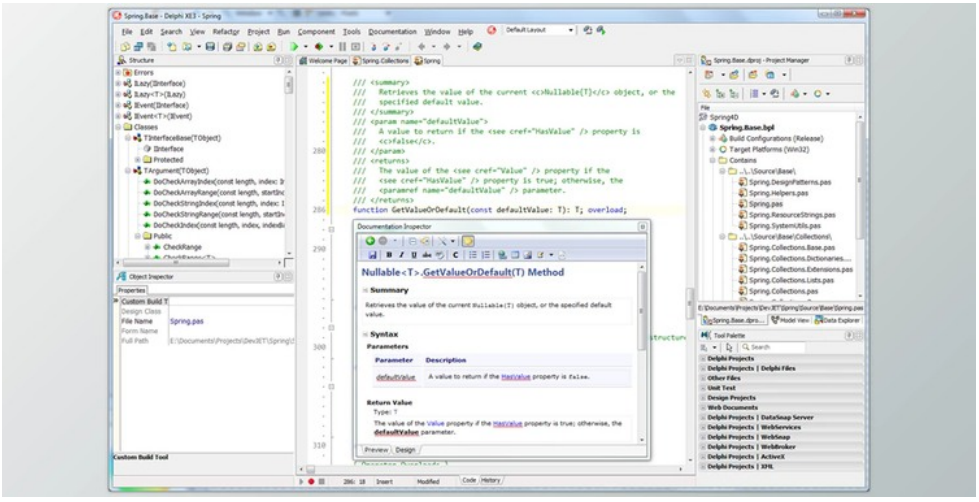
DevJet Software Documentation Insight Enterprise v3.11.12.10 (10 Dec 2021) for D10-D11 Alexandria Retail

2026-09-04 12:08:26



Documentation Insight has the capability to incorporate into the user RAD Studio IDE easily and flexibly in order to permit the user to navigate as well as the record the source of the code. It also has the capability to help the user in order to generate the expert API documentation as well as the document, and also to send them to the client of the user. It should be noted that Documentation Inspector is considered to be dock able type right in the RAD Studio and has the capability to extract the documentation of the XML from the source of the code and reveals the documentation which is live for the present component of the code in the code editor for the user. Along with the remarkable editor of WYSIWYG that it has, it is incredibly easy and flexible for the user to record the source of the code. Documentation Explorer has the capability to immediately reveal the source of the code as well as the arrangement along with the documentation. It is possible for the user to navigate all the documentation of the API, and also to record the user source code from the Explorer of the documentation without even having to change it to different units. It has the capability to offer a complete feature set in order to assist the user to create different documentation documents of API, which includes:

- The pages of the internet such as online sample as well as HTML.
- Microsoft Access to documentation files.
- The process of integration into the cleaners of RAD Studio.
- And last but not least help and the manual 5/6.
