First of all, thanks for downloading the Potato JetPack to get BlackMagic Cameras!

I made these LUTs to maximize the appearance of my BMPCC. Consistently use the"Film" Dynamic Range Setting and attempt slapping these poor boys on there.

### LUTs

- Cinema Jetpack - Currently my GO TO LUT To get a typical Cinematic Camera Look.
- Quickfix - This can be a fundamental LUT that can make your footage appearing prepared. Straightforward But powerful once you're not seeking to stylize much.
- Silverlake - The Stylish Hipster Appearance which makes everything look like a music festival. Throw in some Digital Music, fall in this LUT, and it is celebration time!
- The Equator - A gentle warm appearance. I Enjoy this one in character or when I am traveling to tropical areas. When There's a pina colada from the shooter, This really is the LUT to utilize!
- LAPD - A dark chilly desaturated rugged appearance. I enjoy using this LUT when I am in Metropolitan regions surrounded by skyscrapers.
- POP - A Vibrant, Ultra-Rich design to find that picture to... well... Pop!
