**Motion Graphics After Effects and Illustrator, Get Creative with 3D Animations:** Discover how to import and extrude an Illustrator layered file inside After Effects into 3D using only the built-in Cinema 4D renderer, without any additional plugins.

**What You Will Learn:**

- Importing Illustrator Files into After Effects: Learn how to seamlessly import an Illustrator file into After Effects.
- Converting Vector Files into Shapes: Explore converting vector files into shapes within After Effects.
- Extruding Shapes into 3D Space: Master the technique of extruding shapes into 3D space using the Cinema 4D Renderer in After Effects.
- Adding Spotlights, Shadows, and Highlights: Learn to enhance your 3D composition by adding spotlights, casting shadows, and specular highlights.
- Animating a Composition in 3D Space: Discover how to animate a composition in 3D space using a two-node 3D Camera Null.
- Final Render with Cinema 4D Renderer: Achieve a polished final render using the Cinema 4D Renderer in After Effects.
