Desktop Preset Installation

Adobe Lightroom presets are pre-made adjustments for the Lightroom software that can be applied to your photos. To install Lightroom presets, you must first download them to your computer. Once the presets are downloaded, open Lightroom and go to the Develop module. Next, click on the "Presets" panel on the left side of the screen. At the bottom of the Presets panel, you will see a button labeled "Import Presets."

Click on that button and navigate to the location on your computer where you saved the presets you downloaded. Select the presets and click "Import." The presets will now be available for use in Lightroom.

Mobile option A: Sync Presets from Adobe Lightroom to Mobile Version To sync presets from the desktop version of Adobe Lightroom to the mobile version, you must have an Adobe Creative Cloud account and the Lightroom mobile app installed on your mobile device.

Here are the steps to sync your presets:

- Open Lightroom on your desktop computer and go to the Develop module.
- Click on the "Presets" panel on the left side of the screen.
- Select the presets that you want to sync.
- Right-click on the selected presets and choose "Sync with Lightroom mobile."
- Log in to your Adobe Creative Cloud account if prompted.
- Open the Lightroom mobile app on your mobile device and log in with the same Adobe Creative Cloud account.
- Go to the "Presets" section in the app and see the synced presets there.
- Now you can apply the synced presets to your photos in the Lightroom mobile app.
- Please note that this feature only works with the Lightroom classic version. Also, the presets will only be available in the mobile app if you log in with the same Adobe ID you used to sync them.

Mobile option B: DNG trick from Adobe Lightroom to Mobile
Installing DNG file presets into the mobile version of Adobe Lightroom is a bit different than installing them in the desktop version.

Here are the steps to do it:

- First, you must download the DNG file presets to your mobile device.
- Open the Lightroom mobile app once the DNG files are on your mobile device.
- Tap the "+" icon in the bottom right corner to create a new album.
- Name the album and tap on the "Add Photos" button.

- Select the DNG files you want to add to the album and tap "Add."
- Now, tap on the three dots in the top right corner of the album.
- Select "Create Preset" from the menu.
- Give the preset a name and select the adjustments you want to include.
- Tap on "Create" to finish.

The preset will now be available in the "Presets" section of the Lightroom mobile app, and you can apply it to your photos by selecting the photo, then clicking on the three dots in the top right corner, then clicking on "Edit in preset" and select the preset you just created.

Please note that the DNG files should be unmodified and contain the adjustments you want to include in the preset. Also, the preset will only be available in the mobile app if you log in with the same Adobe ID you used to create the preset.

You will receive a download link upon purchase and via email. It will also contain more information as well as tips for making use of the presets.

It was checked with Apple iPhone RAW, Canon, DJI, Leica, Nikon, Olympus, Panasonic, and Sony files.

This pack works with Lightroom 4 and 6, Lightroom CC, and Lightroom Classic CC. Lightroom Presets can be used with RAW, DNG & JPEG images.

What is Jack Harding Preset Pack?

Presets are pre-defined settings for editing photos or videos. They allow users to apply a consistent and specific look to their visual content with a single click. Photographers and creators often develop preset packs containing presets, each designed to achieve a particular style or mood. These presets can be used with various photo or video editing software, such as Adobe Lightroom, Adobe Premiere Pro, or other editing tools.

Jack Harding Preset Pack is a collection of Adobe Lightroom presets developed by the photographer Jack Harding. These presets are intended for use in Adobe Lightroom, a popular photo editing software, and they can likely be used on desktop and mobile versions.
