Blender Market – Procedural Alleys v2.1.0: Do you require an alleyway space for your production? With Procedural Alleys, you can create it in just a few minutes.

Procedural Alleys give you an easy method of creating and customizing your alleys by adjusting many aspects to create a unique setting.

Two kinds of alleys are:

- Front Alley: Choose the design of your scene, creating a narrow dark alley, or even add streetlights and powerlines using the nodes, transforming the alleyway into a vibrant street of life.
- Back Alley: darker narrow alleyway with back staircases, pipelines, containers, and cables hanging in the wall.

Simple control to personalize your alleys

Adjust the width and height of each alley, and alter the quantity or position of the wall's details, along with other settings.

Replace the assets of the original by acquiring your own

It is possible to replace the original assets by using others quickly; just read the manual to learn more about accomplishing it.

The High-Performance Assets:

To cut down on rendering times and possible crashes to reduce the risk of crashes, we optimize all images by shrinking the size to the minimum to strike the right optimal balance between performance and quality.

This pack comes with the following resources:

- Frontal Windows
- Doors, Frontal Shops, and garages
- Powerline
- Streetlights
- Windows Specifications (Air dryers, clothesline, and curtains)
- Windows Edges: Details (Wires as well as pipes)
- The Lateral Wall Assets (Stairs, conduits, and much more)
- Floor Assets (Doors containers, doors, and more)
- Wall signs
- Sewers
- Sidewalk
