Georgia Bourke: Studio Luxe Set:

This collection features 22 Lightroom/ACR presets, including 17 color presets for achieving natural luminous skin tones and 5 black and white presets for striking edits. Tailored for natural light photographers, these presets provide a solid foundation for indoor photography, allowing for easy customization to match individual shooting styles. They aim to deliver clean, warm skin tones and metallic, depth-filled black and whites.

The presets are specifically designed for RAW images and are compatible with Lightroom and Adobe Camera Raw on desktop, but not for mobile use.
