Blender Market - Mudrock:

The MudRock collection is a versatile set of 100% procedurally generated mud, clay, dirt, stone, and lava materials designed for Blender, primarily optimized for Cycles but compatible with Eevee. It offers extensive customization, including texture animation controls, randomizers, and compatibility with external textures and masks for stylized or realistic effects. Ideal for animators, illustrators, VFX artists, and designers, it enables the creation of expansive, non-repetitive textures, perfect for CG stop-motion projects or dynamic environments. With easy-to-use settings, it supports commercial use, making it a powerful tool for procedural material creation.
