Anni Graham – Glacier Preset: This pack differs from the other presets I've made. It's a minimal simplified set with lower color input to give an elegant, classic, and timeless look. These preset have helped me take my photographs to a new level by making them consistent across different lighting conditions and identifying ways to improve the color theory.

Gfx plugin details of Anni Graham – Glacier Preset

The product is in the **Lightroom category**, for more information about this post you can click on the home page link in the sidebar.

Included Files:

Glacier Preset with modifiers and two B+W presets, which are compatible with desktops running all versions of Lightroom and Photoshop and on mobile devices using The Lightroom Mobile App. Below you'll discover more about how you can best utilize these presets and how they can alter your photos in just a few clicks.

Pink Highlights

There's something beautiful and feminine about putting just a hint of Pink to the highlights of my photos. I use this feature often, mainly when I shoot editorial photos, and highlights in Pink can also neutralize to block out greens on any background.

Cool Greens

This mode makes subtle adjustments to reduce the impact of dominant green backgrounds and cool down the green tones while keeping the skin tone warm.

Soft Blues

Blues are particularly saturated in front-lit photographs with full sun, which can become overwhelming. This modifies blue tones making them more visible but also more unified with other colors of a photograph.

Cool Shadows

This modifies the background's blue hues and is my top choice to create ba lue hour or flash photographs.

Glacier BW - 1

A stark contrast between black and white filters can transform any image into a breathtaking classic. I'm a sucker for black-and-white images, and this preset takes my photos to a new level.

Glacier BW - 2

This preset is soft shadows and low contrast in my passion for film and vintage black and whites.
