- 2.

The Object Remover – Cloning Toolkit VH-45271860 for Davinci Resolve offers a fast solution for removing logos or unwanted objects from videos. By creating a mask of the object and replacing it with a copied portion, users can seamlessly edit their videos.

How can users remove logos or unwanted objects from videos in After Effects using tools?

They can use the "Object Remover – Cloning Toolkit" to access this tool.

The tool's built-in tracker enables effective object removal even in videos with camera movements. Suited for various video genres like weddings, corporate events, food, and sports, where concealing logos or brands is necessary. The package includes a video tutorial and is compatible with both the studio and free versions of Davinci Resolve.
