Unity Asset - IntelliMap AI Tilemap Generator v1.2.1: Introducing IntelliMap AI Tilemap Generator, a powerful Unity asset designed to revolutionize your 2D map design workflow. With IntelliMap, you can effortlessly create stunning AI-generated tilemaps without any coding required. Whether you're a seasoned developer or starting, IntelliMap offers editor tools and runtime generation capabilities to enhance your game environment creation process.

Additionally, IntelliMap PRO is now available, offering improved build times and new enhancements and features. Existing IntelliMap users can upgrade to IntelliMap PRO at a discounted rate. With its user-friendly interface and extensive capabilities, IntelliMap is the ultimate asset for game developers seeking to create captivating 2D environments effortlessly.

- Editor tools for quick creation of vast environments with just a few clicks.
- She detailed level generation at runtime for dynamic gameplay experiences.
- Compatible with any 2D tilemap, supporting single-layered and multi-layered tilemaps.
- Supports various tilemap types, including rectangular, isometric, and hexagonal.
- Seamless integration with Unity's Tilemaps, eliminating the need for external tools.
- Customizable features to fine-tune generation according to your preferences.
- Comprehensive documentation and video tutorials for easy implementation.
- Simple API for creating custom runtime behaviours, enhancing flexibility and control.
- A complete source code is included for advanced customization and optimization.
- Includes 8 example scenes with unique tilemaps and tilesets for inspiration and guidance.
