SOUND EFFECTS

Absolutely modern sound for a synth that's free and a major player in the electronic scene.

Vital Essentials is a curated collection of carefully crafted sounds that are the most exciting free wavetable synth that will be on the scene in long time. We've created some seriously innovative and contemporary bass patches that cover a variety of genres, with inspiring arps, distinct pads, wicked leads that have serious character, and SFX that can make an impact on any mix and entice the attention of your ears. Simply put it's a must-have feature for Vital users who create modern electronic music.

Gfx plugin details of Ghosthack Essential Sounds for Vital [Synth Presets]
The product is in the **SOUND EFFECTS category**, for more information about this post you can click the home page link in the sidebar.

The 100 different synths have four fully-programmed macros that assist you in managing the most important aspects of each sound and give you more control over what you require most. Vital is a very user-friendly and flexible synth, which means you can use the presets however you'd like to explore using some knobs and do it with confidence.

We've also included more than 30 sounds for you to incorporate into your projects and within the Vital synth! These samples were utilized in the various samples in this collection and easily switch for other sounds by using the sampler included in Vital. This is a great option to help to make a sound more fitting in your work and stand out from the crowd!

How do you import a vital bank-file to Vital

1. Start your Vital synthesizer either as a standalone application or as a plug-in within your DAW.
2. Click the menu icon or right-click the preset's name and then click "Import Bank".

3. The file manager on your OS will open.
4. Then, go to the location from where you downloaded this product. Enter the "Vitalbank"-folder Select the Vitalbank within it, and then confirm the selection.
5. The Presets should be added to the Vital as well. You should be able to choose the presets from the browser for presets and compose music using the presets!
