

## CityTraffic 2.039 for 3DS Max 2024

2025-02-10 16:37:17    [label](#) [我要反馈](#)    [下载页面](#)

**CityTraffic 2.039 for 3DS Max 2024:** CityTraffic can be used as a plug-in to 3ds Max that helps create traffic flow off-roads and on roads. Special road editor and automated car setup significantly speed up making scenes for simulation of traffic movements. There are many different configurations for every vehicle. It's about the adjustment of suspension brackets or a way of driving, giving the possibility of creating a realistic simulation. Dynamics calculation helps make the movements of cars on complex surfaces more realistic, while the artificial intelligence system allows vehicles to function independently.

## Gfx plugin details of CityTraffic 2.039 for 3DS Max 2024

### Version 2: New functions

- A new method of creating roads that are based on Splines
- Automated construction of standard intersections
- Advanced Artificial Intelligence for Vehicles
- More realistic and real-time behavior of traffic flow
- The speed of calculation for simulations has increased.
- Support for vehicles with six-wheels
- A simple system for cloning vehicles
- The use of traffic lights is simplified and enlarged. Traffic light functions
- New objects include "speed limiter," "obstacle," and "stop line."
- Better parking
- The suspension of vehicles has been improved.

You are in the right place if you already use CityTraffic version 1. xx. 1. xx CityTraffic 2 is essentially an entirely new system based on Artificial Intelligence technology, which differs from the system used for versions 1. xx. In addition, the entire roadway construction and traffic management algorithm has been drastically altered. Therefore, we haven't been able to offer compatibility. Therefore, scenes made in versions 1. xx cannot be adequately opened, and in CityTraffic 2. But, we've retained the option of installing CityTraffic 1. xx and CityTraffic 2 on the same version of 3ds Max. This allows you to work on the files created using older versions and move to the latest version in a step-by-step manner whenever it is feasible and necessary. This CityTraffic 1. xx license can't be used with CityTraffic 2, and you'll have to apply for another license to use CityTraffic 2 by contacting us at [mail@rendering.ru](mailto:mail@rendering.ru). Most CityTraffic 1. xx customers will receive the CityTraffic 2 license free of cost.

### SYSTEM REQUIREMENTS:

- Three versions of 3dsMax: 2009, 2010 and 2011 2013, 2014, 2015, 2016, 2017, 2020, 2021 in 2019 20, 2022, 2024,
- 3ds Max Design: all
- OS: Windows XP, Windows Vista, Windows 7, 8, 10, 11, all 32 and 64-bit
- Realistic simulation of complex traffic
- Artificial Intelligence-based system for calculating car move
- The suspension brackets are correctly calculated. brackets
- Inbuilt editor for the road system
- Multi-line roads are created from the Spline

平面设计

- The creation of crossroads is easy
- Support for multi-level overpasses as well as bridges
- Support for parking, traffic lights, and bus stops
- Flexible control of speed-related modes for each road segment
- Support for various types of vehicles: cars, buses,
- Obstacles to pedestrian traffic caused by objects, as well as other objects that block roads
- Auto-rigging of cars with just one click
- Automatic compression of animations to reduce the size of the scene
- Activation of Both the node-locked or floating/server is available. Rendering nodes don't require activation.

**What is CityTraffic 2.039 for 3DS Max 2024?**

CityTraffic 2 is a significant update over the previous version (CityTraffic 1. xx). It introduces several enhancements and features, including an AI-based system, improved road construction and traffic management algorithms, and enhanced vehicle configurations for more realistic simulations.

One notable point is that CityTraffic 2 is not backward compatible with CityTraffic 1. xx, which means scenes created in the older version cannot be directly opened in CityTraffic 2. However, users have the option to install both versions of CityTraffic (1. xx and 2) on the same version of 3ds Max, allowing them to transition to the latest version gradually as needed.
