NAMESPACE AND FRAMEWORK

C# is the programming language of this project. The application framework code will be implemented in a custom namespace.

Namespace:

MyCompany

The same identifier will be also used to name the web application theme and the connection string in the configuration file.

Framework:

.NET Framework 4.6

Page Implementation:

Single Page Apps (*.html)

Source Control (learn more):

None

This project is located in [My Documents]\Code OnTime\Projects\Web Site Factory\Downloadly folder.

Use display name to identify your project. Enter a group to organize the related projects.

Display Name:

Downloadly

Group:

USER INTERFACE

Select the User Interface for your application using the dropdown below.

Touch UI

Touch UI is mouse and keyboard friendly, works great on modern desktop computers, as well as mobile devices, tablets, and touchscreen PCs. The responsive UI will adapt to any screen.

Classic user interface is compatible with the browsers of older computers equipped with a mouse and keyboard. Recommended for end users with Internet Explorer 9 and earlier.
