

Blender Market - Radiant v1.3.2

2025-02-10 16:39:32 [label](#) [我要反馈](#) [下载页面](#)

Blender Market—Radiant v1.3.2: Radiant is an essential add-on designed to streamline lighting management within Blender scenes. Its core features include the Light Panel, offering a convenient side panel interface to access and manipulate multiple lights simultaneously, and the innovative Raymesh tool for creating volumetric light effects efficiently.

How can we streamline lighting management in Blender scenes?

You can use "Blender Market—Radiant."

Where can I download the product?

After subscription, You can download it for free from here.

"Blender Market - Radiant " Samples:

The Light Panel provides a clutter-free overview of lights in the scene, allowing users to categorize them with customizable tags for easy filtering. Unlike traditional outliner views, Radiant's Light Panel focuses solely on lighting elements, enhancing productivity, especially in complex scenes. Users can fine-tune light properties such as power, shadow softness, and colour temperature directly within the panel, simplifying the lighting workflow.

Moreover, the Raymesh tool enables the creation of compelling volumetric light effects through geometry and shader-based techniques, optimizing performance in Eevee while offering compatibility with Cycles. Leveraging custom properties, Raymesh seamlessly integrates with light sources, empowering artists to achieve sophisticated lighting effects with ease.

Radiant caters to both novice and experienced Blender users, offering intuitive controls and powerful functionality to enhance the lighting process and elevate the visual quality of rendered scenes. Whether designing architectural visualizations, animations, or cinematic sequences, Radiant empowers artists to achieve stunning lighting effects efficiently within the Blender ecosystem.
