Unreal engine - Foliage Vol 4 – Spruce Trees v5.3: Introducing a comprehensive collection of Spruce Tree assets tailored for game development, meticulously crafted by Dekogon Studios Artists. This project encompasses everything depicted, including all Unreal Engine's assets, maps, and materials meticulously created. With a focus on AAA quality style and budget, each asset within this collection is designed to integrate seamlessly into your gaming environment.

This collection features 22 meshes, including a balanced mix of 11 Nanite and 11 low-poly models, and offers versatility and flexibility in game design. The high-quality and fidelity texture sets boast 4k textures, ensuring stunning visual fidelity and immersion within your game world. Simplify your workflow with a master material setup that controls most props and models, offering consistency and ease of customization.

Fine-tune your assets with additional roughness, albedo, normals, and more controls, allowing for precise adjustments to achieve your desired aesthetic—benefit from channel-packed Roughness, Metalness, and Ambient Occlusion maps, optimizing performance while maintaining visual quality. Enhance your visuals with a realistic post-process and Look Up Table (LUT), adding depth and atmosphere to your game environment.

These assets are optimized for games, ensuring smooth performance without compromising visual quality allowing you to create immersive gaming experiences. Rest assured that these assets are free of all legal issues, as all branding and labels are custom-made by Dekogon Studios, ensuring compliance and peace of mind. Each model is meticulously detailed from all sides, providing players with a high level of realism and immersion.

Immerse yourself in a lush and vibrant game world with this comprehensive collection of Spruce Tree assets. Whether you're a seasoned game developer or a newcomer to game design, these assets provide the tools to bring your vision to life with stunning realism and immersive gameplay experiences.
