#### CSI SAFE:

SAFE is a comprehensive software tool designed for the engineering design of floor systems, integrating all aspects of modeling, analysis, design, and reporting into a single intuitive interface. Featuring the powerful SAPFire® Analysis Engine, SAFE supports multiple 64-bit solvers, Eigen and Ritz analyses, and parallel processing for enhanced efficiency. It excels in modeling foundations, basements, and footings, with automatic adjustments for soil supports based on mesh changes. It includes functionalities for defining design strips and post-tensioning layouts, along with support for various design codes for reinforced concrete and steel structures.
