Unity Asset - Fantasy Forest Environment v2.3.1:

Introducing a comprehensive pack boasting over 120 prefabs meticulously crafted to fashion stylized forest environments in Unity. From majestic trees and lush bushes to rugged rocks and enchanting mushrooms, this collection equips you with everything needed to create captivating scenes. Explore dynamic variations with demo scenes available in summer, autumn, and winter settings.

Render Pipeline Compatibility:

- Built-in Render Pipeline: Unity's default render pipeline offering general-purpose rendering with limited customization.
 - Universal Render Pipeline (URP): A Scriptable Render Pipeline allowing for quick and flexible graphics customization, delivering optimized visuals across diverse platforms.
 - High Definition Render Pipeline (HDRP): A Scriptable Render Pipeline enabling the creation of high-fidelity graphics tailored for high-end platforms.
- 23 meticulously crafted, tileable hand-painted terrain textures.
 - Diverse array of tree models including 7 conifers, 2 deciduous, and 3 birch trees, each featuring autumn and winter variants, totaling 36 tree prefabs.
 - 13 intricately detailed terrain meshes including grass, bushes, and flowers, enhanced with vertex alpha for realistic wind effects.
 - 53 prop models ranging from whimsical mushrooms to rugged rocks, fences, and scenic elements like water plants, tents, campfires, bridges, and waterfalls.
 - Engaging particle effects comprising water splashes, fiery flames, falling leaves, swirling dust, mist, and snow.
 - Custom tree shader with globally controlled wind movement, managed effortlessly via a single script.
 - Dive into immersive demo scenes offering three distinct variants: summer, autumn, and winter, each showcasing the pack's versatility and potential for creating captivating forest landscapes.
