G-Presets + Dani Purington Presets: Dani Purington, a true advocate of authenticity, skillfully weaves vibrant color into her work, capturing spontaneous moments with an elegant touch. Her reputation shines brightly, a testament to her timeless palette across her entire body of work. As a globetrotting elopement photographer, she embraces ever-changing landscapes, channeling her passion into preserving the unique color stories each location unfolds.

This collection features dynamic and natural color settings, serving as an ideal starting point for crafting powerful presets. With color as the focal point, you can confidently capture the richness of diverse locales. From the vivid red rocks of Moab to the lush green redwood forests bathed in dappled light and the golden hues of sunset along the coast.

Dani Purington Presets comprises nine color presets embedded in profiles, and two black and white presets (*see below for compatibility). These presets, integrated into Custom Profile Sliders, allow for personalized adjustments while maintaining color prominence (except for the black and whites).

Note: These presets exclusively function with Lightroom Classic CC (version 7.5 or later), Lightroom CC (version 1.3 or later), and Adobe Camera Raw (version 10.5 or later). For earlier versions, updating your editing applications is mandatory. This preset pack purchase does not include lrtemplate files.

Please be aware that these presets are designed for RAW images only and are solely compatible with the specified software versions. These are desktop presets and are not suitable for mobile use.
