

CData Drivers for IBM Informix v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:03:00 [label](#) [我要反馈](#) [下载页面](#)

CData Drivers for IBM Informix seamlessly integrate live IBM Informix data into various applications, reporting tools, and databases through standards-based drivers. The drivers facilitate easy connectivity with BI, Reporting, Analytics, ETL Tools, and Custom Solutions, supporting accessibility from diverse sources. For BI and Analytics, they provide swift connections to real-time IBM Informix data with unmatched query performance and comprehensive access, seamlessly integrating with popular analytics tools.

In ETL, Replication, and Warehousing, **CData Drivers for IBM Informix** integration ensure robust, secure data movement, supporting replication, query offloading, and various data management tasks. The drivers extend support to favorite ETL tools, enabling efficient integration with RDBMS or data warehouses connected to IBM Informix. They cater to data management needs by supporting widely used database protocols like ODBC, JDBC, ADO.NET, and wire-protocol interfaces for SQL Server and MySQL.

streamline integration with workflow and automation tools, providing straightforward access from popular applications such as BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more. The drivers offer developers a simplified, data-centric model for IBM Informix integration, accelerating application development and ensuring efficiency. Additionally, they support data virtualization features, providing a virtual database abstraction on top of IBM Informix data with advanced capabilities for improved query performance.

This package includes the following components:

[Web & Script](#) [Other](#)

- Excel Add-In for IBM Informix
- IBM Informix ADO.NET Provider
- IBM Informix BizTalk Adapter
- IBM Informix Data Cmdlets
- IBM Informix FireDAC Components
- IBM Informix JDBC Driver
- IBM Informix MuleSoft Connector
- IBM Informix ODBC Driver
- IBM Informix Power BI Connector
- IBM Informix SSIS Components
- IBM Informix Tableau Connector

Key Features of CData Drivers for IBM Informix :

1. Seamless integration with live IBM Informix data
2. Connectivity with BI, Reporting, Analytics, ETL Tools, and Custom Solutions
3. Swift connections to real-time IBM Informix data with unmatched query performance
4. Comprehensive access to IBM Informix data and metadata
5. Integration with popular analytics tools
6. Robust, reliable, and secure data movement for ETL, Replication, and Warehousing
7. Support for replication, query offloading, and data management tasks
8. Compatibility with favorite ETL tools
9. Support for various database protocols, including ODBC, JDBC, ADO.NET
10. Integration with workflow and automation tools, including BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more
11. Simplified, data-centric model for IBM Informix integration for developers
12. Support for data virtualization features, including a virtual database abstraction and advanced capabilities for improved query performance.
