### What's a LUT?

A Look-Up Table (**LUT**) is a Document with CUBE or .3DL expansion, comprising math instructions to substitute a color (according to RGB value) by a different one. It is just like a color grading preset. This approach is done pixel by pixel with rather higher precision.

These LUTs are harmonious with pictures shots from all cameras.

- Warm & Rich Golden Tones:** Immediately add warmth and richness to your photographs with these 5 earthy appearances. Great for outdoor and landscape portraits, all these premium LUTs will give your pictures a timeless sense.
- Install & Access Started:** Whether you're using LUTs In Photoshop, Lightroom, Premiere, or some of those other great photo/video editing applications on the market, these LUTs are for you!
