Blender Market – Fog Planes Addon v1.0 .1: Introducing the Fog Planes addon, your go-to tool for enhancing 3D environments with atmospheric fog effects. This comprehensive addon simplifies creating realistic fogs, quickly adding a touch of mystique to your renders.

The add-on package includes 30 fog planes, which are conveniently organized for easy navigation within the library. The shader seamlessly integrates into the addon panel, streamlining workflow for quick adjustments. Additionally, the fog emitter feature allows for manual manipulation and looping of fog planes, adding dynamic movement to your scenes.

Ideal for 3D environment artists, the Fog Planes add-on empowers users to effortlessly transform the ambiance of nature scenes with just a few clicks and shader tweaks.

While Fog Planes excel in providing atmospheric effects, they may not replace ultra-realistic VDB fogs in all scenarios. It's essential to consider camera angles to conceal the inherent 2D nature of fog planes for optimal results. Elevate your renders with the Fog Planes addon, creating captivating atmospheres that enhance the visual impact of your 3D environments.

- **Extensive Library:** Access a categorized gallery of fog textures with advanced shaders for fine-tuning fog plane adjustments directly within the addon panel.
- **Enhanced Fog Textures:** Each fog texture has been meticulously edited for increased noise and depth, resulting in more lifelike fog effects.
- **Expanded Library:** Enjoy ten new, hyper-realistic fog planes, bringing the total library to 30, offering various options for various scene compositions.
- **Efficient Resource Usage:** Fog planes are lightweight, reducing strain on machine resources and ensuring smooth workflow without compromising quality.
- **Dynamic Motion Effects:** Utilize the integrated shader to customize the appearance of fog planes, with the ability to keyframe changes for captivating animations.
