**Aescripts Diffusae v2.0.2 (Win, Mac-v1.4.1):** Diffusae is a plugin that brings potential from Stable Diffusion into After Effects. Experience and play with the generative AI directly within your preferred application! There are no usage charges and monthly plans for subscriptions. Diffuse offers a simple workflow for installing and running open-source software on your PC. It runs locally, with no limit on the number of images that can be created.

**This is a list of items in our roadmap, as well as their status as of today:**

- Stable Diffusion 1.5 Available
  - Stable Diffusion 2.1 Available
  - Stable Diffusion 2 (Depth) Newly Available
  - The model helps to create coherence in the image by looking at the depth of the image.
  - Instruct Pix2Pix Newly Added This model is more reliable for videos and lets you specify a specific change to the image.
- Added support for Intel Macs
  - Progress is now reported when an incomplete model download needs to be finished
  - Fixed black output with the GTX 1660/1660 Ti
  - General bug fixes
