CData Drivers for Oracle Sales provide seamless connectivity for a variety of purposes. Easily integrate Oracle Sales data into BI, reporting, analytics, ETL tools, and custom solutions, enabling efficient data access and manipulation. Whether it's real-time data access or comprehensive metadata integration, our tools offer unmatched query performance and simplify the integration process with your preferred analytics platforms.

Extend the functionality of your ETL processes with our robust drivers and adapters, ensuring reliable and secure data movement for replication and warehousing needs. Connect your data warehouse or RDBMS with Oracle Sales effortlessly, enhancing operational reporting, and query performance, and supporting critical functions such as data governance and disaster recovery. Support for popular protocols like ODBC, JDBC, and ADO.NET facilitates easy management of Oracle Sales data from various database management applications.

Streamline workflow and automation with seamless integration into popular data migration, ESB, iPaaS, and BPM tools. provide straightforward access to Oracle Sales data from a wide array of applications, simplifying development and accelerating application-building processes. With a focus on a data-centric model, developers can create higher-quality applications faster, while our drivers offer advanced features like query delegation and predicate pushdown for efficient data virtualization.

This package includes the following components:

- Excel Add-In for Oracle Sales
- Oracle Sales ADO.NET Provider

- Oracle Sales BizTalk Adapter
- Oracle Sales Data Cmdlets
- Oracle Sales FireDAC Components
- Oracle Sales JDBC Driver
- Oracle Sales MuleSoft Connector
- Oracle Sales ODBC Driver
- Oracle Sales Power BI Connector
- Oracle Sales SSIS Components
- Oracle Sales Tableau Connector

Key Features of **CData Drivers for Oracle Sales** :

1. Seamless connectivity for Oracle Sales data integration
2. Integration with BI, reporting, analytics, ETL tools, and custom solutions
3. Real-time data access and comprehensive metadata integration
4. Unmatched query performance
5. Robust drivers and adapters for ETL processes
6. Reliable and secure data movement for replication and warehousing
7. Support for data governance and disaster recovery
8. Compatibility with popular protocols like ODBC, JDBC, and ADO.NET
9. Streamlined workflow and automation integration
10. Connectivity with data migration, ESB, iPaaS, and BPM tools
11. Straightforward access to Oracle Sales data from various applications
12. Simplified development with a data-centric model
13. Faster application building with higher-quality deliverables
14. Advanced features like query delegation and predicate pushdown for efficient data virtualization.
