AeScripts ScaleUp v1.4.3 For After Effects (Win, Mac-v1.4.0): ScaleUp is an advanced video-improving device, it can enlarge videos by as much as 10x with marginal photo quality loss.

With the AI-powered technology, the ScaleUp device can not only upscale your footage but also enhance the video high quality. It can boost the picture resolution while protecting the details.

To expand the image, as opposed to inserting the pixels utilizing the traditional bilinear/ bicubic methods, intelligent AI modern technology is used to research and also examine the pixels of the huge amount of photos and clips utilizing the neural network to enhance the photo high quality, and decrease the noises, also the block results in the compressed video.

Furthermore, the ScaleUp plugin is GPU-increased for Adobe After Effects and Adobe Premiere Pro and is readily available for Mac and Windows.

- Simple and easy-to-use controls.
- Enlarge photos while completely protecting photo quality. (Click on the image for the complete-sized version.).
- Recover lost structures as well as details from reduced-resolution images intelligently. ScaleUp produces strikingly sharp pictures with just one click, easy as build-in detail-preserving upscale, however with much higher quality.
- Intelligent AI modern technology analyzes the pixels of a large number of pictures as well as clips making use of the semantic network to enhance the photo's top quality, as well as reduce the noises, also the block effects in the compressed video.

New Changes:

- Anchor point added
- Support for Multi-Frame Rendering
- Added two AI modes: Sharp and Cartoon
- Rename Advance mode to Fast mode
- Handle tile boundary better
