Additionally, it is entirely written in English;

I'll supply over 100 designs to alter and modify according to your preferences. Gemstones!

This course includes a few minutes of theoretical lectures interspersed with simple, practical tutorials. You'll be accompanied in your journey by the expertise and knowledge of Matteo, Italian excellence in cutting stunning and original gemstones and designs.

The lessons provide practical and concrete examples that will allow you to be self-sufficient in producing synthetic and natural semi-precious and precious stones.

In a few stages, you'll become an expert gemstone designer. The course is designed to enable you to design your gem design from scratch to showcase an example of your portfolio in an interview for a job, for instance, and also to make money from the designs you've designed in part or entirely to grow your workshop gradually and earn a profit.

There are also exercises(with solutions), practical instances of gems with multiple faces, and numerous tips in the art of trade.

At the end of this video course, you can use the Gem-Cut Studio software, a powerful computer software that can create gemstones, improve existing gems, and mimic optics with just a few clicks.

Are you looking to continue your research in this fascinating field? Check out our other courses on video. Contact us for participation in workshops held annually and practical laboratory classes to increase your knowledge and skills.
