CData Drivers for RSS offers a comprehensive suite of RSS drivers and connectors for seamless data integration, enabling effortless consumption of live RSS feed data across a variety of applications. These solutions streamline the integration of RSS data with BI, reporting, analytics, ETL tools, and custom solutions, facilitating easy access to real-time feeds from anywhere. With unmatched query performance and comprehensive access to RSS data and metadata, **CData Drivers for RSS** ensure seamless integration with preferred analytics tools, making it the fastest and easiest way to connect real-time RSS data with BI and reporting technologies.

From extending ETL tools with RSS connectivity to providing dedicated solutions for ETL/ELT and data warehousing, offer robust, reliable, and secure data movement capabilities. By facilitating connections between RDBMS or data warehouses and RSS feeds, organizations can enhance operational reporting, offload queries for improved performance, and support data governance initiatives effectively. Additionally, features such as support for popular database protocols and wire-protocol interfaces ensure easy management of RSS data from a wide range of database management applications.

Developers benefit from **CData Drivers for RSS**, which offers a data-centric model that dramatically simplifies integration efforts. With straightforward access to RSS data from popular applications and advanced data virtualization capabilities, including query federation and delegation/predicate pushdown, developers can build higher-quality applications faster than ever. Overall, **CData Drivers for RSS** empowers organizations to harness the full potential of RSS data, driving efficiency, agility, and actionable insights across their data integration initiatives.

This package includes the following components:

- Excel Add-In for RSS
- RSS ADO.NET Provider
- RSS BizTalk Adapter
- RSS FireDAC Components
- RSS JDBC Driver
- RSS ODBC Driver
- RSS Power BI Connector
- RSS SSIS Components
- RSS Tableau Connector

Key Features of **CData Drivers for RSS** :

1. Seamless integration with BI, reporting, analytics, ETL tools, and custom solutions
2. Effortless consumption of live RSS feed data across various applications
3. Unmatched query performance and comprehensive access to RSS data and metadata
4. Support for extending ETL tools with RSS connectivity
5. Robust, reliable, and secure data movement capabilities
6. Facilitation of connections between RDBMS or data warehouses and RSS feeds
7. Enhancement of operational reporting and query performance
8. Support for popular database protocols and wire-protocol interfaces
9. Simplified data management from a wide range of database management applications
10. Straightforward access to RSS data from popular applications
11. Data-centric model that simplifies integration efforts for developers
12. Advanced data virtualization capabilities, including query federation and delegation/predicate pushdown
