Nik Collection 6 comes with significant productivity enhancements to enhance your creativity.

We've added more options, improved the existing tools, revamped specific plugins, and enhanced many features.

Local adjustments are rewarded with five thrilling enhancements

With almost every plugin, local adjustments can gain five new features to improve your photos.

- Combining the potential that comes from Control Points with the flexibility of linear gradients by using the brand-new Control Lines tool
- Make sure you tie the effect from Control Points and Control Lines to the intensity and hue of certain areas of your image using innovative Color Selectivity sliders
- You can achieve absolute accuracy with your local adjustments by allowing you to invert and diffuse the Control Points and Control Lines.
- Be on top of your edits due to the possibility of modifying the names of your local edits
- Save all your edits in your control now to save your local edits in your presets

Enhancements to the flow of work

Choose where to place the adjustment sliders to make your workflow smoother. You can keep their place in the bar to keep an easy-to-use interface or go back to the past and put them over the image to allow quick adjustments.

This new level of control comes with new methods to control your settings. Everything can be saved to an existing preset, which makes it simple to make quick adjustments.

New productivity features for the workplace.

Narrow and smooth

Unlock the powerful, non-destructive capabilities of Smart Objects within a matter of seconds -- right from any plugin.

Invoke any of your recent 15 plugin edits and apply them with just one click.

Can't you locate an appropriate preset? The new search feature lets you search for them.

Under the Hood

Minor changes can create a huge impact

The suite is almost 100% conforming to Apple Silicon. Additional free upgrades are scheduled to be available before the end of the summer season and will bring compliance to 100%.

Multiple screens are not an issue with no additional effort

Affinity Photo has been recognized in the installation procedure. No more fumbling with integration.

New Interface Experience, New Experience

The new interface for Nik Viveza and Nik Silver Efex is sleeker, more attractive, and more practical. It also gives you faster access to all the available tools and presets so that you can focus on the thing that matters most--finding your style.

Include Control Points in your customized presets

Save your preferred presets that you've made using Control Points. Apply the same design to multiple images while preserving a particular portion of your image. This is an excellent method to apply a color effect to multiple photographs and blurred backgrounds!

Create an efficient and user-friendly workflow.

Since Control Points now have fewer sliders, and because Control Points now feature fewer sliders, you can see the effects applied more clearly. To optimize your workflow, you could change their names.

Change the level of saturation for a particular tone range

With the new Color Tolerance setting, Users can now not only choose the color they wish to change, but they can also alter the tolerance of similar colors.

Mix the settings of multiple plugins in one click.

Meta Presets can be accessed directly through your Nik Selective Tool in Adobe Photoshop to combine all the settings and presets from the different Nik Collection plugins to apply various effects with one click.

Incredible photos

Find 10 of the Meta presets developed by professional photographers. These presets instantly enhance your landscape and wildlife photography with an original design without ever leaving Adobe Photoshop.

Retouching lightning-fast

Utilizing the Last Edit feature, you can create the previous preset you employed using any of the Nik Collection plugins.

Smart Copy and Paste

You can apply the finish of a plugin to a single or a few photographs directly within Adobe Lightroom without needing to launch an interface. Nik Collection interface. The definition of productive.

Plus, striking black-and-white images

Nik Silver Efex now features innovative ClearView technology initially introduced within DxO PhotoLab. Reduce haze, improve local contrast, and give photos a new dimension.

Create color

Nik Viveza features ten native presets created by professionals who shoot professional photos. Choose the one you prefer and customize your local adjustments. There are endless possibilities!

Reconnect to the emotional impact of analog.

Recreate the exact finish of films that made their impression on photography's history: Nik Silver Efex features 39 ultra-realistic grains to allow you to create authentic black-and-white photos.

Create and share

Create and save your personal presets using Nik Viveza. It is easy to share or import them to a different computer to continue editing wherever you are.

Control your tones

With Nik Viveza's newest Selective Tone Tool, you can tweak your images to give you more control over the brightness of lighting, mid-tones, and shadows.

Color temperature adjustment

Nik Viveza's newest Color Temperature Selector lets you choose the same whiteness of your image to ensure a perfect white balance.
