**Risograph Grain Effect for Posters CM - 6919310:** The same grain effect sprayed but with more scattered particles floating across the globe! Risograph's photo effect for posters is a fantastic method to inject some class and creativity into your work. Add the look of the old-fashioned letterpress printing to contemporary images in a horizontal poster format!

Millions of dots are scattered of different intensities, and somewhere between, your photo is obscured. The ability to create grunge-like looks in a matter of seconds isn't difficult and neither is adjusting the outcome of an effect that is applied to a photo your photo. You can switch between **three options for grain intensity** to determine the right one that is right for you. Looks great with black and white images and with any composition with shadows!

- 3-grain intensity style of grain;
- 3000x4500 px, 300 dpi;
