Digital Pet Paintings Using Photoshop: Join this comprehensive course, where I will guide you through transforming your pet photographs into unique digital paintings using Photoshop. With step-by-step instructions, I demystify the intricacies of Photoshop, enabling you to transition from a photographic look to a more painterly one.

While I've simplified the steps, a basic understanding of Photoshop is highly recommended, making this course perfect for intermediate to advanced users who have never painted before. Not an artist? No worries; this course is designed for everyone.
Whether you're a professional photographer aiming to stand out by offering paintings as a unique product or a creative hobbyist, you'll find all the necessary information to kickstart your journey into creating remarkable art. By the end of this course, you'll possess the skills to turn any pet photograph into a digital painting that you can proudly share with your family and friends.

Digital art can be crafted from various images, including low-resolution ones from phone cameras. You don't need to own a camera to benefit from this course. Watch me paint in real time as I explain each step throughout the course. In the supplemental material sections, you'll find the image used in the course for download, allowing you to practice alongside me. Moreover, you'll acquire the skills needed to transform any pet image into a captivating painting.

Whether you're a photographer looking to enhance your images, an artist delving into digital painting, or someone eager to turn photographs into digital art, this course is for you. However, it's not recommended for Photoshop beginners.
Enroll today, and let me guide you in discovering an enjoyable way to create art!
