What's New?

The align tool in After Effects has received a significant upgrade, addressing its limitations and enhancing functionality to match Illustrator's powerful align tool.

Align Pro revolutionizes the align tool in After Effects, providing a comprehensive and intuitive solution for precise layer alignment and distribution. Say goodbye to limitations and elevate your motion graphics workflow with Align Pro!

- Align to Key Layers: Align or distribute layers precisely to critical objects, specifically crucial layers. Select the essential layer first, followed by the layers you want to align.
- Distribute Spacing: Distribute layers with exact spacing between each one. Enter the desired pixel spacing amount, and let Align Pro handle the distribution.
- Ignore Parents: Avoid alignment errors caused by parenting layers to null objects or other layers. Align Pro lets you ignore a layer's parent while aligning or distributing.
- Clever Functionality: Experience intelligent features that enhance workflow and minimize alignment issues.
- Detect Paragraph Text: Choose whether to align and distribute text layers as point text or paragraph (area) text. Align Pro considers a layer's full bounding box when working with paragraph text.
- Center or Average: Unlike After Effects' built-in align tool, Align Pro allows you to choose between calculating the average and exact center points when centrally aligning selected layers.
- Responsive Panel: The panel is designed to be responsive, allowing you to stretch it out and seamlessly switch its layout to suit your workspace preferences without clutter.
