2025-08-20 10:13:59    [label](#)    [我要反馈](#)    [下载页面](#)

The HiQPdf Library for .NET as well as the .NET Core which has the capability to supply the users and developers along with a contemporary, simple and at the same time a fast adaptable, and even a highly effective tool in order to produce a complex as well as a fashionable document of PDF in the software along with the simple line of code. The implementation of the very best quality of HTML to the format of PDF conversion engine which is very simple in order to design a listing in the HTML with the use of the JavaScript, canvas, SVG, and even turned them into a PDF maintaining the particular material, as well as fashion.

### HiQPdf Library for .NET Great Features:

- It is incredibly quick and precise HTML conversion to the PDF technology: The HiQPdf Library for .NET has the capability to offer the users and developers with the fast and precise HTML to PDF conversion technology in order to utilize on the user internet and desktop application easily and flexible. The HTML to PDF converter has the capability to convert everything to the PDF in the document of HTML or even a URL for the users in the modern browser which can exhibit and keep all the styles of CSS and Implement all the JavaScript which has been situated in the document of HTML.
- Powerful and distinctive characteristics that are available on the marketplace: apart from the common features that are available on the HTML to PDF converter, the component of the HiQPdf has unique features that are available on the market just like the assistance of the web fonts right from the internet open font format and the capability in order to convert a selected area of the HTML document or even a choice in order to float multiple files of HTML and the document at the specific PDF whenever preserving the most translucent background as well as the images that are available in the file of HTML.
- Converting the modern HTML5 record along with the JavaScript, CSS3, SVG, and finally canvas: The conversion of the HiQPdf HTML to the format of PDF has the capability to render the document of HTML along with the previous generation content just like the scalar vector graphic, canvas and even the styles of CSS3. The JavaScript engine is considered to be very fast and has the ability to manage a complex create and can exhibit in the web page of HTML along with the items that the user desires to use to manually trigger the process of conversion or to determine the different information regarding the converter along with the conversion.
- The support for the internet font as well as the internet open font format: It has the capability to render the HTML files with the use of the web fonts, true type, open type with the use of the true type outlines. The internet font supply is considered to be having an excellent flexibility go to users and designers in order to generate the exceptional consequences on the text right inside the HTML document. They are basically not restricted anymore to the very small groups of the fonts that are installed on the computer of the client and it can reveal the document of HTML. The web fonts are basically downloaded out of the converter and has the ability to utilize in order to depart the document of HTML to PDF without having to install the fonts on the device of the user. The location from where the phones are capable of being downloaded is basically supplied at the CSS3.
- There is a support for the media fundamentals in the CSS in order to have a distinct layout for the process of printing and displaying: With the use of the media CSS which is located inside the HTML document the user has the capability to have a single layout or the screen, for the process of printing and one for the handheld device. By default, the HTML to PDF converter has the capability to depart the HTML file for the screen but it can layout the document for the users and developers in order to get another media-type by simply placing the property in the code of the user.
- Easy and flexible accreditation without even having the run time or deployment of the cost: The HiQPdf Software is basically licensed per the seat of the developers, and each developer chair has the ability to give a programmer the best in order to operate an application with the use of the application component. There is no excess run time or even installment prices, and the license never expires and it contains the software upgrades for the users and developers.
